

MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY

INTEROFFICE COMMUNICATION

December 15, 2016

TO: File for Quinacridone Pigment (CAS No. 1047-16-1)
FROM: Mike Depa Toxics Unit, Air Quality Division
SUBJECT: Change in the Initial Threshold Screening Level (ITSL)

The ITSL for quinacridone pigment was changed from 0.04 $\mu\text{g}/\text{m}^3$ to 0.1 $\mu\text{g}/\text{m}^3$ (annual average) in 1998.

The change in the ITSL was made due to a revision in the State's air toxic rules which became effective on November 10, 1998. Previously, the ITSL had been set pursuant to Rule 232(1)(i). This rule sets the ITSL at a default value of 0.04 $\mu\text{g}/\text{m}^3$ (annual average) when no specific data are available to determine an ITSL. The November 10, 1998 revisions to the rules changed this default ITSL to a value of 0.1 $\mu\text{g}/\text{m}^3$.

No updated review of the literature has been done since the ITSL was originally set at a value of 0.04 $\mu\text{g}/\text{m}^3$, to determine if new data are available for this compound.

MICHIGAN DEPARTMENT OF NATURAL RESOURCES

INTEROFFICE COMMUNICATION

March 9, 1994

TO: File for Quinacridone Pigment (CAS # 1047-16-1)
FROM: George Eurich
SUBJECT: Screening Level for Quinacridone Pigment

A search of the following databases turned up no information useful in determining a screening level:

| | |
|-------------|--------------------------------|
| RTECS | NIOSH REL |
| IRIS | NTP MANAGEMENT STATUS REPORT |
| EPB LIBRARY | IARC MONOGRAPHS |
| ACGIH | EPB CHEMICAL CRITERIA DATABASE |
| HEAST | CAS ONLINE (1967-1994) |
| NLM SEARCH | |

The ITSL for QUINACRIDONE PIGMENT has been set at trace - 0.04 $\mu\text{g}/\text{m}^3$ based on annual average time.
