Re: SRN/ID: N1112

We have received and reviewed your Violation Notice dated May 12, 2015 and would like to offer the following written response, including:

- 1) Based on information included in your notice we have been in violation since the operation's inception on February 1, 2009.
- 2) We were informed by the previous business owners that the scope of the operation in its current state was underneath any reportable thresholds as required by the state and the scope of the business has not grown in an excessive manner since inception which would have led us to pursuing further information.
- 3) The violation will be ongoing until we complete an application for and receive an approved Permit to Install as indicated in your notice.
- 4) We will obtain and submit the Permit to Install application by June 19, 2015 unless otherwise delayed.
- 5) We will react and respond to any other requirements that may arise in the application process.
- 6) We will abide by any continuing permit reporting or renewals as required once a permit is obtained.

We look forward to working with the Air Quality Division in an effort to bring our facility into compliance going forward. Please feel free to contact me should any additional information be required in this initial written response.

Cordially,

Herman C. Siegel III, President
