Dear Mr. Siegel:

VIOLATION NOTICE

On April 29, 2015, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of Hillside Industries, located at 550 East Ellis Avenue, Belding, Michigan. The purpose of this inspection was to determine Hillside Industry's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); and the administrative rules.

During the inspection staff determined the following:

Process Description	Rule/Permit Condition Violated	Comments
Aluminum Foundry Operation	Rule 336.1201	Failure to obtain a Permit to Install prior to installation.

During this inspection, it was noted that Hillside Industries had installed an aluminum foundry operation prior to obtaining a Permit to Install; this is a violation of Act 451, Rule 201.

A program for compliance may include a completed Permit to Install application for the aluminum foundry operation. An application form is available by request, or at the following website:

http://www.deq.state.mi.us/aps/nsr_information.shtml#AUP

Be advised that Rule 201 requires that a permit be obtained prior to installation, construction, operation, reconstruction, relocation, or alteration of any process or process equipment which may be a source of an air contaminant.
