SUBJECT: Waste oil furnace		
RESOLVED COMPLAINTS:		

On 3/25/2016 I conducted an unannounced inspection of this facility. My contact was the service manager, Mr. Mike Betti.

The facility continues to collect waste oil generated from work in the shop. The oil is burned in a waste oil furnace and helps to heat the work space. Sample N3162-1 was obtained. This will be sent to the laboratory for analysis.

Final determination of compliance will be made upon receipt of the laboratory results.

On 4/11/16 the laboratory results for sample #N3162-1 taken on 3/25/16 were received. The results show the sample to be in compliance for the parameters of waste oil.

The facility is found to be in compliance with the Air Pollution Control Rules and PTL # 939-91.
