RESOLVED COMPLAINTS:		

On 1/25/2017 I conducted an unannounced inspection for this facility. My contact was Mr. Mike Betti, the service manager for this facility.

The facility continues to operate their waste oil furnace permitted under PTI #939-91. Waste oil is collected from mechanic work done on the premises and the burned in the furnace to heat the shop. Sample N3162-1 was obtained from the oil tank and will be sent to the laboratory for analysis. Final determination of compliance will be made upon receipt of the results from the laboratory.

On 2/8/17 the results from the laboratory analysis were received. Sample N3162-1 was found to be in compliance with the standards for waste oil.

This facility is in compliance with PTI #939-91 and the Air Pollution Control Rules.
