

DEPARTMENT OF ENVIRONMENTAL QUALITY  
AIR QUALITY DIVISION  
ACTIVITY REPORT: Scheduled Inspection

N376354193

FACILITY: U P FABRICATING CO INC		SRN / ID: N3763
LOCATION: 3954 W MAPLE RIDGE RD, ROCK		DISTRICT: Upper Peninsula
CITY: ROCK		COUNTY: DELTA
CONTACT: Kristin Bartlett , Office Manager		ACTIVITY DATE: 07/08/2020
STAFF: Sydney Bruestle	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Onsite Inspection to verify compliance with Permit to Install (PTI) 238-93 and all other applicable state and federal air quality regulations.		
RESOLVED COMPLAINTS:		

On July 8, 2020 I (Sydney Bruestle) performed an onsite inspection at UP Fabricating located at 3954 Maple Ridge Road Rock, MI. While onsite I met with Kristin Bartlett. Ms. Bartlett was able to show me the permitted equipment and provide me with records required by permit to install (PTI) 238-93.

UP Fabricating processes structural steel, they receive metals and weld, cut, and paint them to meet a variety of customer orders. The facility is all one building. PTI 238-93 covers the painting process and spray booth. The spray booth wasn't operating during my inspection, I was not able to verify there were no visible emissions coming from the stack. Below is a summary of the records required by PTI 238-93.

The Volatile Organic Compound (VOC) emission rate limits/records are detailed below (Records are also attached to the hard copy of this report).

VOC Limit	2019 Records	2020 Records
15.3 lbs/hr	1-5 lbs/hr (records attached)	1- 5 lbs/hr (records attached)
2.1 tons/year	1.65 tons	0.8 Tons (Though July 5, 2020)

At the time of my inspection it appeared UP fabricating was in compliance with PTI 238-93 and all other applicable state and federal air quality regulations.
