Attn: April Lazzaro, Senior Environmental Quality Analyst

Ref: SRN: P0361 Kent County

Dear Ms. Lazzaro:

This letter is being sent in response to your visit of April 6, 2023 to Andronaco plants 1 & 3. I sent the response under separate cover without addressing the request for an extension. At this time, we request an extension to the due time it's going to take to do the background work and studies asked for in the Violation Notice letter of May 15, 2023.

Our plan for the consultant is as follows:

- 1.) The permit requirements vs. the recordkeeping
- 2.) The exceedance of Styrene content limit
- 3.) The failure to calculate emissions of VOC and acetone
- 4.) An inventory of plant equipment that may meet the criteria of permitted or exempt.

Please let me know if there is anything else we can do in the short term to satisfy this request.

Sincerely,

A handwritten signature in blue ink that reads "Colleen Bowden".

Colleen Bowden
Environmental, Health and Safety Manager
