AIR QUALITY DIVISION
ACTIVITY REPORT: On-site Inspection

N587558271

FACILITY: SAGINAW WILBERT VAULT CORP		SRN / ID: N5875
LOCATION: 465 KING ST, HEMLOCK		DISTRICT: Bay City
CITY: HEMLOCK		COUNTY: SAGINAW
CONTACT: Sara Shetler , CEO/COO		ACTIVITY DATE: 06/02/2021
STAFF: Gina McCann	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Inspection of PTI 180-96A.		
RESOLVED COMPLAINTS:		

Mr. Nathanael Gentle and I (glm) performed an announced inspection of the Saginaw Wilbert Vault facility in Hemlock. We were met by Ms. Sara Shetler and Matt Kabacinski.

Mr. Kabacinski , Saginaw Wilbert technician, showed us both the units. Only one unit was in operation and it was operating at a temperature of 1632F. Mr. Kabacinski relayed that once the afterburner reaches temperatures of 1675F it will turn off to cool the unit and turn back on at 1630F. This is done to prevent and uncontrolled burn. We discussed maintenance on each unit also. Unit 2 had the entire retort relined about a year and a half ago and unit 1 had the back half of the retort relined at the beginning of 2021.

The facility was able to produce monthly records of the number of cremations performed in each incinerator and the temperatures of those cremations. No visible emissions were observed during the inspection.

At the time of the inspection the facility was in compliance with its permits.
