Re: Violation Notice response, SRN: N6301, PTI 264-97

Mr. Deskins:

This letter shall serve as the written response to the Violation Notice dated October 29, 2015.

Special Condition 20.c:

Date of Violation: 10/23/15

Explanation: The completion date of a project is typically not known in advance as the customer determines the schedule given many site and project considerations including the project budget and need for crushed material. The tear down, transportation, and installation time for our operation is typically four days. The relocation notices are currently being mailed as soon as possible at the completion of a current location/project. The violation is not ongoing.

Actions taken: Implemented administrative controls to:

1. Improve communication with the customer to better predict completion dates.
2. Improve communication from the crushing operation to the Construction Recycling Systems office to ensure that the relocation notices are mailed as soon as there is enough information available to predict completion dates.

Date of action: November 9, 2015.

Prevention: Improved communication with customers and employees will provide a better means to predict the completion date of projects. This information will be used in order to ensure that notices are received by the appropriate MDEQ AQD Office not less than three days prior to the scheduled relocation.

Please contact me with any additional comments or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Todd Jensen".

R. Todd Jensen
President
