RE: CORRECTIVE ACTION PLAN per Violation PTI No. 101-23 – SRN: N6647 Kent County

Attn: Ms. April Lazzaro, Sr Environmental Quality Analyst
EGLE, AQD, Grand Rapids District
350 Ottawa Avenue NW, Unit 10
Grand Rapids, MI 49503

April,

Per Violation Notice of August 30, 2023, we are replying to advise our corrective action plan regarding failure to install stack at estimated time. It has been addressed as follows;

1. Stack Install. The stack was promised to be installed by vendor on August 30, 2023. However, due to unforeseen circumstances in production the blower motor did not arrive until approx. 10 days later. Unit has now been installed and was electrically connected and operational as of September 19, 2023. The stack is now at correct height and operation per design and height recommendations.
2. While we feel this provides complete corrective action and compliance, we also are adding stack height to our other blower as a secondary back up and also changing the current dust collection system from a blow down angle to a blow out angle to avoid any minor discharge in a downward angle.

At this point, we believe we are in complete compliance in regard to discharge and this completes our corrective action plan. If you have any questions or concerns, please don't hesitate to email or give me a call. Thanks for your assistance and patience in this matter.

With Best Regards,

Tim Dyer
