This was an unannounced visit and served as a follow up to Torello/AQD's email dated August 21, 2014 requesting records. Mary never received the email. At this time the recordkeeping device on the incinerator not functioning, and will be replaced along with remodeling. It is anticipated the remodeling will take place in the next three months.

On January 5, 2015 Torello called Mary and asked about the monitor. Mary said the monitor will be installed indoors along with the remodeling. The groundwork is started, and Mary hopes to have the remodeling completed in April 2015.
