Permit Violation – October 2, 2018**

Dear Ms. Jenine Camilleri,

On August 30, 2018 Mr. Dave Morgan, Environmental Quality Specialist, Air Quality Division conducted an inspection at North Kent Sewer Authority. Mr. Morgan found a violation of Rule 201, please find a copy of the Violation Notice with this letter.

I have completed the Permit to Install Application for our generator and have included the generator specification sheets and the fuel SDS sheets.

It was our understanding that this unit was exempt of needing an air permit because it is an emergency stand-by power unit for a municipal wastewater treatment plant and the unit has only ran for 380 hours over the last 10 years. Mr. Morgan has explained that is not the case and that we need to complete this permit process.

If you have any questions, concerns or need additional information, please contact me at your convenience.

Thank you.
