RESOLVED COMPLAINTS:		

Facility: Angelo Luppino Inc (SRN: P1276)

Location: Pit Lane, Bessemer, MI

Contacts: Paul Luppino, President; Amy, Office Staff

Regulatory Authority

Under the Authority of Section 5526 of Part 55 of NREPA, The Department of Environment, Great Lakes, and Energy (EGLE) may upon the presentation of their card, and stating the authority and purpose of the investigation, enter and inspect any property at reasonable times for the purpose of investigating either an actual or suspected source of air pollution or ascertaining compliance or noncompliance with NREPA, Rules promulgated thereunder, and the federal Clean Air Act.

Facility Description

Angelo Luppino Inc is a general construction and asphalt paving company. The company is based out of Iron Belt, WI and works throughout Northern Wisconsin and the Western Upper Peninsula.

Emissions

Stone crushing and processing operations can cause point and fugitive emissions of PM, PM10, and PM2.5. Emissions from process operations should be considered fugitive unless the source of emissions is vented through a force-air vent or stack. Fugitive sources of emissions are generated from machine movement and wind erosion. Emission sources can include hauling, crushing, screening, and transferring of material. The primary factors affecting PM emissions are wind and moisture content of the material. Spray bars on crushers and screens, along with the use of dust suppressants on roadways reduces fugitive dust emissions from activity by 60% to 85%. Moisture on the surface of the material can cause fine particles to adhere resulting in a dust suppression effect.

Emissions Reporting

Angelo Luppino Inc. has not yet reported to MAERS because they have not operated in the State of Michigan. The facility is flagged to report as equipment associated with the PTI is subject to NSPS OOO.

Regulatory Analysis

The facility is subject to General PTI No. 60-22. The facility is subject to NSPS Subpart 000 by having a portable crushing plant with a crushing capacity of greater than 150 tons/hr and equipment that has been constructed after August 31, 1983

Compliance History

The facility has not received any violation notices in the past five years. The facility has not previously been inspected.

Inspection

On July 25, 2023, AQD Staff (Lauren Luce) conducted an off-site targeted inspection at Angelo Luppino Inc. AQD Staff spoke with Amy, Office Staff, via phone at Angelo Luppino who relayed that the crusher associated with PTI No. 60-22 is not operating in the State of Michigan. An email was then received from the company by AQD staff stating that the crusher has not yet operated in the Michigan and currently there are no plans to operate in Michigan. The company would like to keep the permits valid at this time. The company is aware of VE testing requirements.
