Dear Mariah Scott,
Thank you for directing me to Act 451 and open burning regulations in response to your visit on March 14 2024. I have instructed the people that that placed furniture with plastic lamination and pallets on the brush pile that this is not allowed. There was also one road killed deer on the brush pile. It is unclear to me as to why the report states there were a total of three deer carcasses. Our typical method for disposal of dead animals would be to bury them. Sorry that this one was burned. We will return to burying any future road killed animal bodies on our properties. These correction have been implemented as of April, 1 2024.
