RE: SRN U112000929, Berrien County

Dear Mr. Deskins:

I am responding to the violation that occurred on March 4, 2020 of Smith Mfg. Company located at 1636 Red Arrow Hwy., Benton Harbor, Michigan. Two wood burning furnaces were being used to heat the facility. Only wood which was generated on property was being burned. This created the odors and smoke that were observed by you upon inspection. The burning of this wood was ongoing during the months when heat was needed for the facility. It is no longer ongoing.

The violation has been corrected as the two wood burning furnaces are no longer in use. The furnaces will be removed and will not be used in the future. This will prevent a reoccurrence of the stated violation.

Sincerely,

Scott E. Smith  
President, CEO  
269-925-8155

cc: Ms. Jenine Camilleri, EGLE
