Dear Mr. Hartmann and Mr. Bolle:

VIOLATION NOTICE

On May 24, 2017, the Michigan Department of Environmental Quality (MDEQ), Air Quality Division (AQD), performed an asbestos NESHAP (National Emission Standard for Hazardous Air Pollutants) inspection at 610 Trimble Street, Kalamazoo, Kalamazoo County. The purpose of this inspection was to determine compliance with the requirements of Title 40 of the Code of Federal Regulations, Part 61, Subpart M (National Emission Standard for Asbestos), and Rule 942 of Part 55, Air Pollution Control of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451).

According to my investigation, the Kalamazoo County Land Bank owns the residential property and Bolle Contracting, LLC was hired to perform the planned renovation activities. The renovation was scheduled to begin on May 6, 2017, and end on May 13, 2017. The National Emission Standard for Asbestos holds both the owner and operator equally liable for any violations.

During the post planned renovation inspection, AQD staff Craig W. Dechy observed the following:

The residential structure had not been abated of regulated asbestos-containing material (RACM) within the Notification of Intent to Renovate/Demolish project schedule. The owner and contractor had failed to revise the Notification's project schedule, and had allowed it to expire.
