Bay City, MI 48708

Dear Ms. McCann

Re: Colombo Manufacturing, LLC - Air Quality Violation Notice (Sandblasting)

Thank you for your letter and Notice dated March 14, 2023, which was received by Colombo Manufacturing, LLC on the 21st of March. For your records, please note that the former Kelly Industrial business was purchased by Colombo Manufacturing, LLC in April of 2022, as a going concern, and the blast air handling systems identified in your letter were in-place when purchased by Colombo, and not installed nor modified by Colombo since purchase.

Nevertheless, we appreciate the comments contained in your Notice, and propose the following Rule 336.285(2) improvements:

Action

Projected Install by Date

- | | |
|--|--|
| • Set up new blast booth | Late summer 2023 |
| • Install dust collector | Early Fall 2023 (following new blast booth const.) |
| • Add additional filter to new dust collector | Late Fall 2023 |
| • Add container barrel for gravity capture of waste material | Late Fall 2023 (Project complete date) |

For your reference I have enclosed a photo of the location of the new floor slab location and dust collector to be installed. We anticipate that the new installation will meet or exceed requirements of both EGLE and MIOSHA.

It is my understanding that you will forward this response to appropriate individuals. If you wish me to send copies, please let me know and I will be happy to do so. I am available to address any questions you may have regarding the improvements described above.

Yours Very Truly

James Fuller,

Plant Manager

Colombo Manufacturing, LLC
