Mr. Scott McNutt, VP Mill Manager
Dunn Paper, Inc.
218 Riverview Street
Port Huron, Michigan 48060

Dear Mr. McNutt:

This letter is in reference to your Permit to Install (PTI) application identified as No. 514-95B (State Registration Number A6218) for the paper manufacturing plant located at 218 Riverview Street, Port Huron, Michigan. The application requested enforceable limits for oxides of nitrogen, sulfur dioxide, and carbon monoxide to restrict your facility's potential to emit to less than the major source thresholds to opt out of the Renewable Operating Permit Program.

The public comment period ended on March 13, 2017. A public hearing was not requested. The Air Quality Division (AQD) received five comments from one commenter during the comment period.

After careful consideration of the issues and pursuant to the delegation of authority from the Director of the Michigan Department of Environmental Quality (MDEQ), I have approved PTI No. 514-95B. As a part of this approval, we have revised and added conditions to the permit to address certain information received during the public participation process and the subsequent analysis of that information.

The AQD has prepared the enclosed Response to Comments (RTC) document, which provides our responses to comments received during the public comment period. It also identifies the special conditions that have been modified and provides our rationale for modifying the proposed special conditions. These changes are listed in the RTC document.

This approval is based upon and subject to compliance with all administrative rules of the MDEQ and conditions stipulated in the enclosed supplement. Please review these conditions thoroughly so that you may take the actions necessary to ensure compliance with all of these conditions.

Also, PTI No. 514-95A has been voided because the equipment is now covered by PTI No. 514-95B.

To help us improve the service we provide our customers, we encourage you to complete a *Permit to Install Customer Service Survey* on the following Web page:
