MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY AIR QUALITY DIVISION

June 16, 2017

PERMIT TO INSTALL 495-97B

ISSUED TO
Michigan Rubber Products, Inc.

LOCATED AT 1600 Holman Street Cadillac, Michigan

IN THE COUNTY OF Wexford

RIS PENINSULA

STATE REGISTRATION NUMBER N2588

The Air Quality Division has approved this Permit to Install, pursuant to the delegation of authority from the Michigan Department of Environmental Quality. This permit is hereby issued in accordance with and subject to Section 5505(1) of Article II, Chapter I, Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. Pursuant to Air Pollution Control Rule 336.1201(1), this permit constitutes the permittee's authority to install the identified emission unit(s) in accordance with all administrative rules of the Department and the attached conditions. Operation of the emission unit(s) identified in this Permit to Install is allowed pursuant to Rule 336.1201(6).

VE	Agency Visible Emissions	μm	Micrometer or Micron		
VE	Visible Emissions	VOC	Volatile Organic Compounds Year		
	ligators, the property managinal at the gun air as	yr n aball na			

^{*}For HVLP applicators, the pressure measured at the gun air cap shall not exceed 10 psig.

GENERAL CONDITIONS

- 1. The process or process equipment covered by this permit shall not be reconstructed, relocated, or modified, unless a Permit to Install authorizing such action is issued by the Department, except to the extent such action is exempt from the Permit to Install requirements by any applicable rule. (R 336.1201(1))
- 2. If the installation, construction, reconstruction, relocation, or modification of the equipment for which this permit has been approved has not commenced within 18 months, or has been interrupted for 18 months, this permit shall become void unless otherwise authorized by the Department. Furthermore, the permittee or the designated authorized agent shall notify the Department via the Supervisor, Permit Section, Air Quality Division, Michigan Department of Environmental Quality, P.O. Box 30260, Lansing, Michigan 48909-7760, if it is decided not to pursue the installation, construction, reconstruction, relocation, or modification of the equipment allowed by this Permit to Install. (R 336.1201(4))
- 3. If this Permit to Install is issued for a process or process equipment located at a stationary source that is not subject to the Renewable Operating Permit program requirements pursuant to R 336.1210, operation of the process or process equipment is allowed by this permit if the equipment performs in accordance with the terms and conditions of this Permit to Install. (R 336.1201(6)(b))
- 4. The Department may, after notice and opportunity for a hearing, revoke this Permit to Install if evidence indicates the process or process equipment is not performing in accordance with the terms and conditions of this permit or is violating the Department's rules or the Clean Air Act. (R 336.1201(8), Section 5510 of Act 451, PA 1994)
- 5. The terms and conditions of this Permit to Install shall apply to any person or legal entity that now or hereafter owns or operates the process or process equipment at the location authorized by this Permit to Install. If the new owner or operator submits a written request to the Department pursuant to R 336.1219 and the Department approves the request, this permit will be amended to reflect the change of ownership or operational control. The request must include all of the information required by subrules (1)(a), (b), and (c) of R 336.1219 and shall be sent to the District Supervisor, Air Quality Division, Michigan Department of Environmental Quality. (R 336.1219)
- 6. Operation of this equipment shall not result in the emission of an air contaminant which causes injurious effects to human health or safety, animal life, plant life of significant economic value, or property, or which causes unreasonable interference with the comfortable enjoyment of life and property. (R 336.1901)
- 7. The permittee shall provide notice of an abnormal condition, start-up, shutdown, or malfunction that results in emissions of a hazardous or toxic air pollutant which continue for more than one hour in excess of any applicable standard or limitation, or emissions of any air contaminant continuing for more than two hours in excess of an applicable standard or limitation, as required in Rule 912, to the Department. The notice shall be provided not later than two business days after start-up, shutdown, or discovery of the abnormal condition or malfunction. Written reports, if required, must be filed with the Department within 10 days after the start-up or shutdown occurred, within 10 days after the abnormal conditions or malfunction has been corrected, or within 30 days of discovery of the abnormal condition or malfunction, whichever is first. The written reports shall include all of the information required in Rule 912(5). (R 336.1912)
- 8. Approval of this permit does not exempt the permittee from complying with any future applicable requirements which may be promulgated under Part 55 of 1994 PA 451, as amended or the Federal Clean Air Act.
- 9. Approval of this permit does not obviate the necessity of obtaining such permits or approvals from other units of government as required by law.
- 10. Operation of this equipment may be subject to other requirements of Part 55 of 1994 PA 451, as amended and the rules promulgated thereunder.

- 11. Except as provided in subrules (2) and (3) or unless the special conditions of the Permit to Install include an alternate opacity limit established pursuant to subrule (4) of R 336.1301, the permittee shall not cause or permit to be discharged into the outer air from a process or process equipment a visible emission of density greater than the most stringent of the following. The grading of visible emissions shall be determined in accordance with R 336.1303. (R 336.1301)
 - a) A six-minute average of 20 percent opacity, except for one six-minute average per hour of not more than 27 percent opacity.
 - b) A visible emission limit specified by an applicable federal new source performance standard.
 - c) A visible emission limit specified as a condition of this Permit to Install.
- 12. Collected air contaminants shall be removed as necessary to maintain the equipment at the required operating efficiency. The collection and disposal of air contaminants shall be performed in a manner so as to minimize the introduction of contaminants to the outer air. Transport of collected air contaminants in Priority I and II areas requires the use of material handling methods specified in R 336.1370(2). (R 336.1370)
- 13. The Department may require the permittee to conduct acceptable performance tests, at the permittee's expense, in accordance with R 336.2001 and R 336.2003, under any of the conditions listed in R 336.2001. (R 336.2001)

SPECIAL CONDITIONS

EMISSION UNIT SUMMARY TABLE

The descriptions provided below are for informational purposes and do not constitute enforceable conditions.

Emission Unit ID	Emission Unit Description (Process Equipment & Control Devices)	Flexible Group ID	
EU-MillRoller	Barwell mill roller	FGRubberPartsMfg	
EU-MoldPresses	The collection of compression/transfer and injection molding presses. Compression and transfer mold presses process preformed material in molds, while injection molding presses use pressure to force bulk material into molds.	FGRubberPartsMfg	
EU-Autoclave	The autoclave uses steam to cure rubber.	FGRubberPartsMfg	
EU-Extruder1	Extruder number 1. The extruder forces material through a die under pressure.	FGRubberPartsMfg	
EU-Extruder2	Extruder number 2. The extruder forces material through a die under pressure.	FGRubberPartsMfg	
EU-Microwave	The microwave curing oven uses microwave energy to cure products.	FGRubberPartsMfg	
EU-HotAirCure	The hot air rubber curing oven uses electrically-generated heat to cure products.	FGRubberPartsMfg	
EU-PostCure	The post-curing oven uses electrically-generated heat to cure products.	FGRubberPartsMfg	
Changes to the equipment described in this table are subject to the requirements of R 336.1201, except as			

Changes to the equipment described in this table are subject to the requirements of R 336.1201, except as allowed by R 336.1278 to R 336.1290.

FLEXIBLE GROUP SUMMARY TABLE

The descriptions provided below are for informational purposes and do not constitute enforceable conditions.

Flexible Group ID	Flexible Group Description	Associated Emission Unit IDs
FGRubberPartsMfg	Rubber parts manufacturing equipment.	EU-MillRoller, EU-MoldPresses, EU-Autoclave, EU-Extruder1, EU-Extruder2, EU-Microwave, EU-HotAirCure, EU-PostCure

The following conditions apply to: FGRubberPartsMfg

DESCRIPTION: Rubber parts manufacturing equipment.

Emission Units: EU-MillRoller, EU-MoldPresses, EU-Autoclave, EU-Extruder1, EU-Extruder2, EU-Microwave,

EU-HotAirCure, EU-PostCure

POLLUTION CONTROL EQUIPMENT:

None

I. EMISSION LIMITS

Pollutant	Limit	Time Period/ Operating Scenario	Equipment	Testing / Monitoring Method	Underlying Applicable Requirements
1. VOC	6.8 tpy ^A	12-month rolling time period as determined at the end of each calendar month	FGRubberPartsMfg	SC VI.2	R 336.1702(a)
A Includes emissions from rubber processing and from use of mold release.					

II. MATERIAL LIMITS

Material	Limit	Time Period / Operating Scenario	Equipment	Testing / Monitoring Method	Underlying Applicable Requirements
Materials based on ethylene propylene diene monomer (EPDM)	776,000 lbs per month ¹	Calendar month	Curing ovens (EU-HotAirCure and EU-PostCure combined)	SC VI.3.a	R 336.1225(1), R 336.1225(2)
Materials based on EPDM	59,800 lbs per day ¹	Calendar day	Curing ovens (EU-HotAirCure and EU-PostCure combined)	SC VI.4	R 336.1225(1)
3. Materials based on natural rubber (NR) or isoprene rubber (IR)	547,000 lbs per month ¹	Calendar month	Curing ovens (EU-HotAirCure and EU-PostCure combined)	SC VI.3.b	R 336.1225(1)
4. All material processed in the autoclave	150,000 lbs per month ¹	Calendar month	EU-Autoclave	SC VI.5	R 336.1225(1), R 336.1225(2)
5. All material processed in the autoclave	270 lbs per batch	Each batch	EU-Autoclave	SC VI.6	R 336.1225(2)

III. PROCESS/OPERATIONAL RESTRICTIONS

IV. <u>DESIGN/EQUIPMENT PARAMETERS</u>

NA

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years. (R 336.1201(3))

NA

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1201(3))

- 1. The permittee shall complete all required calculations in a format acceptable to the AQD District Supervisor by the last day of the calendar month, for the previous calendar month, unless otherwise specified in any monitoring/recordkeeping special condition. (R 336.1225, R 336.1702(a))
- 2. The permittee shall calculate the VOC emission rate from FGRubberPartsMfg monthly, for the preceding 12-month rolling time period, using a method acceptable to the AQD District Supervisor. The permittee shall keep all records on file at the facility and make them available to the Department upon request. (R 336.1702(a))
- 3. The permittee shall keep, in a satisfactory manner, monthly records of material throughput of the materials listed below. The permittee shall keep all these records on file at the facility and make them available to the Department upon request.
 - a. Materials based on EPDM processed in the curing ovens¹ (R 336.1225(1) & (2))
 - b. Materials based on NR or IR processed in the curing ovens¹ (R 336.1225(1))
- 4. The permittee shall keep, in a satisfactory manner, daily throughput records of the amount of materials based on EPDM processed in the curing ovens. The permittee shall keep all records on file at the facility and make them available to the Department upon request.¹ (R 336.1225(1))
- 5. The permittee shall keep, in a satisfactory manner, monthly records of the amount of material processed in the autoclave. The permittee shall keep all records on file at the facility and make them available to the Department upon request. (R 336.1225(1) & (2))
- 6. The permittee shall keep, in a satisfactory manner, records of the amount of material processed in the autoclave for each batch. The permittee shall keep all records on file at the facility and make them available to the Department upon request.¹ (R 336.1225(2))

VII. REPORTING

NA

VIII. STACK/VENT RESTRICTIONS

The exhaust gases from the stacks listed in the table below shall be discharged unobstructed vertically upwards to the ambient air unless otherwise noted:

Stack & Vent ID	Maximum Exhaust Diameter/Dimensions (inches)	Minimum Height Above Ground (feet)	Underlying Applicable Requirements
1. SVAutoclave	42	18.9	R 336.1225, 40 CFR 52.21(c) & (d)
2. SVPostCureOven	48	19.5	R 336.1225, 40 CFR 52.21(c) & (d)
3. SVExtruderMicro	6 x 6	18.8	R 336.1225, 40 CFR 52.21(c) & (d)
4. SVExtruderHotAir	12 x 12	20.4	R 336.1225, 40 CFR 52.21(c) & (d)

IX. OTHER REQUIREMENTS

NA

Footnotes:

¹This condition is state only enforceable and was established pursuant to Rule 201(1)(b).
