

SUPPLEMENT TO PERMIT NO. 182-00A

D.T.E. Energy Services,

Ford Motor Co., Clay Mine Site
17005 Oakwood Blvd..
Allen Park, Michigan

Revised
January 31, 2001

1. Rule 201(1) - The process or process equipment covered by this permit shall not be reconstructed, relocated, altered, or modified, unless a Permit to Install authorizing such action is issued by the Department, except to the extent such action is exempt from the Permit to Install requirements by any applicable rule.
2. Rule 201(4) - If the installation, reconstruction, relocation, or alteration of the equipment for which this permit has been approved has not commenced within 18 months, or has been interrupted for 18 months, this permit shall become void unless otherwise authorized by the Department. Furthermore, the person to whom this permit was issued, or the designated authorized agent, shall notify the Department via the Supervisor, Permit Section, Air Quality Division, Michigan Department of Environmental Quality, P.O. Box 30260, Lansing, Michigan 48909, if it is decided not to pursue the installation, reconstruction, relocation, or alteration of the equipment allowed by this Permit to Install.
3. Rule 201(6)(a) - If this Permit to Install is issued for a process or process equipment located at a stationary source that is subject to the Renewable Operating Permit program requirements pursuant to R 336.1210, trial operation is allowed by this permit if the equipment performs in accordance with the terms and conditions of this Permit to Install and until the appropriate terms and conditions of this Permit to Install have been incorporated into the Renewable Operating Permit. Upon incorporation of the appropriate terms and conditions into the Renewable Operating Permit, this Permit to Install shall become void.
4. Rules 201(6)(b) - If this Permit to Install is issued for a process or process equipment located at a stationary source that is not subject to the Renewable Operating Permit program requirements pursuant to R 336.1210, operation of the process or process equipment is allowed by this permit if the equipment performs in accordance with the terms and condition of this Permit to Install.
5. Rule 201(8) and Section 5510 of Act 451, P.A. 1994 - The Department may, after notice and opportunity for a hearing, revoke this Permit to Install if evidence indicates the process or process equipment is not performing in accordance with the terms and conditions of this permit or is violating the Department's rules of the Clean Air Act.
6. Rule 219 - The terms and conditions of this Permit to Install shall apply to any person or legal entity that now or hereafter owns or operates the process or process equipment at the location authorized by this Permit to Install. If the new owner or operator submits a written request to the Department pursuant to R 336.1219 and the Department approves the request, this permit will be amended to reflect the change of ownership or operational control. The request must include all of the information required by subrules (1)(a), (b) and (c) of R 336.1219. The written request shall be sent to the District Supervisor, Air Quality Division, Michigan Department of Environmental Quality.
7. Rule 901 - Operation of this equipment shall not result in the emission of an air contaminant which causes injurious effects to human health or safety, animal life, plant life of significant economic value, or property, or which causes unreasonable interference with the comfortable enjoyment of life and property.

8. Rule 912 - The owner or operator of a source, process, or process equipment shall provide notice of an abnormal condition, start-up, shutdown, or malfunction that results in emissions of a hazardous or toxic air pollutant in excess of standards for more than one hour, or of any air contaminant in excess of standards for more than two hours, as required in this rule, to the District Supervisor, Air Quality Division. The notice shall be provided not later than two business days after start-up, shutdown, or discovery of the abnormal condition or malfunction. Written reports, if required, must be filed with the District Supervisor within 10 days, with the information required in this rule.
9. Approval of this permit does not exempt the person to whom this permit was issued from complying with any future applicable requirements which may be promulgated under Part 55 of Act 451, P.A. 1994 of the Clean Air Act.
10. Approval of this permit does not obviate the necessity of obtaining such permits or approvals from other units of government as required by law.
11. Operation of this equipment may be subject to other requirements of Part 55 of Act 451, P.A. 1994, and the rules promulgated thereunder.
12. Rule 301 - Except as provided in subrules (2) and (3) or unless the special conditions of this Permit to Install include an alternate opacity limit established pursuant to subrule (4) of R 336.1301, a person shall not cause or permit to be discharged into the outer air from a process or process equipment a visible emission of density greater than the most stringent of the following. The grading of visible emissions shall be determined in accordance with R 336.1303.
 - a) A 6-minute average of 20% opacity, except for one 6-minute average per hour of not more than 27% opacity.
 - b) A visible emission limit specified by an applicable federal new source performance standard.
 - c) A visible emission limit specified as a special condition of this permit to install.
13. Rule 370 - Collected air contaminants shall be removed as necessary to maintain the equipment at the required operating efficiency. The collection and disposal of air contaminants shall be performed in a manner so as to minimize the introduction of contaminants to the outer air. Transport of collected air contaminants in Priority I and II areas requires the use of material handling methods specified in R 336.1370(2).
14. Rule 285 - Except as allowed by Rule 285 (a), (b), and (c), applicant shall not substitute any fuels, coatings, nor raw materials for those described in the application and allowed by this permit, nor make changes to the process or process equipment described in the application, without prior notification to and approval by the Air Quality Division.
15. The Department may require the applicant to conduct acceptable performance tests, at the applicant's expense, in accordance with R 336.2001 and R 336.2003, under any of the conditions listed in R 336.2001.

REVISED
 SPECIAL CONDITIONS
 January 31, 2001
 (6 special conditions)

1. For purposes of this permit to install, all requirements for notifications or submittal of records to or approvals by the District Supervisor, Air Quality Division should be submitted to the Director of Compliance and Enforcement, Air Quality Management Division, Wayne County, Department of Environment unless you are otherwise notified in writing by the Air Quality Division. At no time shall notifications or submittals to or approvals by both agencies be required pursuant to this permit.

2. Emission Units:

Emission Units	Description	Stacks
EUGENERATOR1	Caterpillar Model 3516B generator rated at 2 MW	SV001
EUGENERATOR2	Caterpillar Model 3516B generator rated at 2 MW	
EUGENERATOR3	Caterpillar Model 3516B generator rated at 2 MW	SV002
EUGENERATOR4	Caterpillar Model 3516B generator rated at 2 MW	
EUGENERATOR5	Caterpillar Model 3516B generator rated at 2 MW	SV003
EUGENERATOR6	Caterpillar Model 3516B generator rated at 2 MW	
EUGENERATOR7	Caterpillar Model 3516B generator rated at 2 MW	SV004
EUGENERATOR8	Caterpillar Model 3516B generator rated at 2 MW	
EUGENERATOR9	Caterpillar Model 3516B generator rated at 2 MW	SV005
EUGENERATOR10	Caterpillar Model 3516B generator rated at 2 MW	
FGGENERATORS	EUGENERATOR1 through EUGENERATOR10	SV001, SV002, SV003, SV004, SV005

3. Applicant shall not operate any of the generators comprising FGGENERATORS for more than 250 hours per 12-month rolling time period as determined at the end of each calendar month. A written log of the operating hours for each engine shall be kept on file for a period of five years and made available to the Air Quality Division upon request. This condition is necessary to ensure that FGGENERATORS will not be a major stationary source as defined in the Federal Prevention of Significant Deterioration regulations, 40 CFR 52.21, and R336.1211(a)(ii), R336.1205(1)(a), and R336.1205(3).

4. Visible emissions from FGGENERATORS shall not exceed a six-minute average of ten percent opacity. (R336.1301(c))

5. Nitrogen Oxides (NO_x) emissions from FGGENERATORS shall not exceed 60.8 tons per year, based upon a 12-month rolling time period as determined at the end of each calendar month. Records of the emissions shall be kept on file for a period of five years and made available to the Air Quality Division upon request. (40 CFR 52.21 and R336.1211(a)(ii), R336.1205(1)(a), and R336.1205(3)).
6. The sulfur content in the fuel oil fired in FGGENERATORS shall not exceed 0.05%, by weight. Records of the sulfur content of each shipment of fuel oil shall be kept on file for a period of five years and made available to the Air Quality Division upon request. (Wayne County Ordinance, Section 6, Rule 6010, and to ensure that FGGENERATORS are not subject to 40 CFR Part 72.7).
