NOTICE OF CHANGE IN PROCEDURE. Effective June 1, 2001, the Land and Water Management Division (LWMD) will implement a change in procedure involving review of applications for permits under Part 31, Water Resources Protection (Floodplain Regulatory Authority); Part 301, Inland Lakes and Streams; Part 303, Wetlands Protection; Part 323, Shorelands Protection and Management; Part 325, Great Lakes Submerged Lands; and Part 353, Sand Dunes Protection and Management, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. Many of these parts contain mandatory timeframes for a final decision; i.e., approval or denial of a permit application. These time limits often make it difficult for LWMD staff and an applicant to complete discussions on a mutually agreeable project modification for which a permit could be issued. As an alternative to receiving a denial, the applicant may withdraw the application prior to the deadline for decision. The applicant can revise the application and request that the LWMD reactivate the application within six months from the date of withdrawal. If the applicant does not withdraw the application before the decision deadline, the LWMD will deny the permit application. An applicant who has received a denial of an application has a right to appeal the denial to the Office of Administrative Hearings through the contested case hearing process. The decision rendered at the conclusion of the contested case process is a final decision of the department. An applicant who has received a denial may also submit a new application with the appropriate fee to have a modified project considered. A copy of the procedure may be obtained by contacting **Kimberly Rice**, Land and Water Management Division, 517-335-3190.

NOTICE OF JURISDICTIONAL CHANGE FOR CERTAIN WETLANDS IN ALLEGAN AND EATON COUNTIES. The U.S. Census Bureau has released the official 2000 census figures. The population for Allegan and Eaton Counties each now exceeds 100,000, which will significantly change the regulatory status of certain wetlands within these counties. Part 303, Wetlands Protection, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, requires permits for certain activities in regulated wetlands. Specifically, a permit is required from the Michigan Department of Environmental Quality to dredge or remove soil or minerals from a wetland; to deposit or place fill material in a wetland; to construct, operate, or maintain a use or development in a wetland; or to drain surface water from a wetland. Section 30301 of Part 303 defines regulated wetlands as those contiguous to the Great Lakes; Lake St. Clair; or any inland lake, pond, river, or stream; and as those noncontiguous wetlands larger than five acres in counties with a population of 100,000 or more. The term "contiguous" is defined in the administrative rules promulgated under Part 303. Allegan and Eaton counties have not met the 100,000 population criterion in the past, and noncontiguous wetlands more than five acres in size have not been subject to Part 303 jurisdiction in these counties. Now that the 2000 census has officially established the population in these two counties at 100,000 or more, noncontiguous wetlands more than five acres in size will come under Part 303 jurisdiction. Permits will be required as of July 1, 2001, for all activities described above in noncontiguous wetlands more than five acres in size, in Allegan and Eaton counties, regardless of when the activity began. Information Contact: **Wetlands Assessment Program**, Land and Water Management Division, 517-373-8000, or at www.deq.state.mi.us/lwm.

REGULATIONS 101 – AN ENVIRONMENTAL, SAFETY, AND HEALTH COURSE. The Michigan Departments of Environmental Quality (DEQ) and Consumer and Industry Services (CIS) are offering a Regulations 101 – Environmental, Safety, and

Health course at various locations throughout the state. The course is an introduction to environmental, health, and safety regulations affecting Michigan's manufacturing industry. The textbook, "Michigan Manufacturers' Guide to Environmental and Safety and Health Regulations," will be provided to course participants. Written by program specialists in the DEQ and CIS, the book is packed full of easy-to-read discussions about state and federal environmental rules. The book also summarizes MIOSHA's safety and health programs. Cost: \$75 which includes continental breakfast, lunch, workshop materials, and copy of the "Michigan Manufacturers' Guide to Environmental and Safety and Health Regulations." Reduced cost of \$50 for those who already have a copy of the Guidebook. **NOTE:** The Guidebook will be used at this course. If paying the reduced fee because you already have a Guidebook, please bring it with you to the course. **Register on-line at www.deq.state.mi.us/ead/eosect/workshop.html.** Registration Contact: **DEQ Environmental Assistance Center**, 800-662-9278, or E-mail at deq-ead-env-assist@state.mi.us.
