

“IS IT GOOD FOR THE ENVIRONMENT?”

The question above is important to these companies. They have made a written commitment to support Michigan’s Great Printers whenever possible.

Michigan’s Great Printers seek to foster pollution prevention within the printing industry.

Pollution prevention is based on a simple yet powerful idea. It makes more sense to eliminate or reduce the generation of waste than to develop complex and costly treatments and methods of disposal.

Great Printers have made a commitment to pollution prevention in their shops.

You can influence printing processes by requesting environmentally sound printing and by supporting Great Printers as a Committed Print Buyer!

Call the Michigan Great Printers Project at 800-662-9278 or visit our website at www.michigan.gov/deq/p2partnerships for more information.
