TO: File for Santoflex 14 (CAS #3081-01-4)

FROM: Marco Bianchi

SUBJECT: Initial Threshold Screening Level

The initial threshold screening level (ITSL) for Santoflex 14 is 0.1 µg/m<sup>3</sup> based on an annual averaging time.

The following references or databases were searched to identify data to determine the ITSL: IRIS, HEAST, NTP Management Status Report, RTECS, EPB-CCD, EPB library, CAS-online, NLM-online, IARC, NIOSH Pocket Guide, and ACGIH Guide. A review of the above databases provided no information to derive an ITSL for Santoflex 14. An LD50 was listed in RTECS, but a request to obtain this information was unsuccessful. Therefore, the ITSL is set at trace.

The ITSL for Santoflex 14 = 0.1 µg/m<sup>3</sup> based an annual averaging.
