Dear Annette Wendland:

**VIOLATION NOTICE**

On September 7, 2023, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of GM Components Holdings located at 2100 Burlingame Avenue SW, Wyoming, Michigan. The purpose of this inspection was to determine GM Components Holdings' compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) numbers 85-19C, 179-98, 246-95, 422-94, 1121-91, 789-89 and 438-73.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Six diesel-fired air compressor engines	Rule 201	Failure to obtain a Permit to Install.

Six diesel-fired air compressor engines installed in April 2023 have actual nitrogen oxide emissions of 79.38 tons per year, which, as defined in Rules 101(b) and 101(k), is greater than the significance levels identified in Rule 119. As such, the installation requires a Permit to Install.

Please initiate actions necessary to correct the cited violations and submit a written response to this Violation Notice by October 10, 2023 (which coincides with 21 calendar days from the date of this letter). The written response should include: the dates the violations occurred; an explanation of the causes and duration of the violations; whether the violations are ongoing; a summary of the actions that have been taken and are proposed to be taken to correct the violations and the dates by which these actions will take place; and what steps are being taken to prevent a reoccurrence.
