RE: Permit #MI-ROP-B1877-2014a - Notice of Violation

October 7, 2015

Brian,

On October 6, 2015 we received a Notice of Violation for exceeding Special Condition I.10 which limits sulfuric acid mist emissions to 1.6 pounds/hour. The violation occurred during a stack test conducted July 21-22, 2015 at which time tests resulted in a 13.3 lb./hour average. Our limit is 1.6 lb./hour.

During one of our phone conversations, you requested we perform a re-test during our next run of Privaguard Glass, the same glass in production during our failed test. Our next scheduled time to produce this glass is during the spring of 2016. As we get closer to that time, we will contact you and coordinate the testing time with your schedule.

In the meantime, we have also scheduled a sulfuric acid mist test for October 22, 2015. I spoke with Mark Dziadosz regarding this date and he confirmed he'll be here for the testing.

I want to thank you for your understanding regarding our glass transitions and the help you've given us as we learn this new system. I hope your schedule remains open and you too will attend this event.

If you have any questions or concerns please call me at 734-654-4381.

Sincerely,

Laura Rye
