SUBJECT: On site inspection for FY24		
RESOLVED COMPLAINTS:		

On June 27, 2024 State of Michigan Department of Environment, Great Lakes, and Energy Air Quality Division staff member Scott Evans (SE) visited the location for the Knoll facility at 921 West Western St. in Muskegon, Michigan, to assess compliance with air quality rules and regulations. This facility was a furniture manufacturing facility that had previously been permitted for boiler operations, which have since been removed and the permits to install voided.

Upon arrival at the address, SE found that the building was vacant and no longer housed the Knoll facility or any other facility. Since there are no operations occurring at the facility it will be marked as permanently closed.
