Dear Mr. Sufyan and Mr. Perko:

VIOLATION NOTICE

On August 2, 2021, and September 29, 2021, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted investigations in response to complaints of fallout in Detroit and Melvindale, respectively. For the August 2 complaint, fallout allegedly occurred between the evening of July 30 and the morning of August 2. For the September 29 complaint, fallout allegedly occurred during the overnight hours of September 28 to September 29. The scope of the investigations included the operations at Edw. C. Levy Plant 6 located at 13800 Mellon Street, Detroit, Michigan. The purpose of the investigations was to determine Edw. C. Levy's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the administrative rules; and Renewable Operating Permit (ROP) No. MI-ROP-B4243-2016.

The investigations of August 2 and September 29 were performed by Mr. Jonathan Lamb, EGLE-AQD. During each investigation, Mr. Lamb observed fallout on vehicles and samples of the fallout were collected during each investigation and sent to a laboratory for analysis. Lab results indicate the composition of the fallout samples collected on August 2 and September 29, 2021, is consistent with materials associated with slag processing at Edw. C. Levy's Plant 6. As a result, the following violation was observed during each investigation:

Process Description	Rule/Permit Condition Violated	Comments
Steel slag handling and processing operations	General Condition 12(b) of ROP No. MI-ROP-B4243-2016 R 336.1901(b)	Detection of fallout beyond the facility's property line, attributable to the facility, of sufficient magnitude as to constitute an unreasonable interference with the comfortable enjoyment of life and property.

Based on the analysis of the fallout samples, the proximity of Edw. C. Levy Plant 6 to each complainant's location, prevailing wind direction on the dates the incidents occurred, and past history of similar fallout incidents attributed to operations at Edw. C. Levy Plant 6, AQD staff has determined Edw. C. Levy Co. Plant 6 is the most likely source of the fallout. In the professional judgment of AQD staff, the fallout observed during each of these investigations was sufficient as to constitute a violation of General Condition 12(b) of ROP No. MI-ROP-B4243-2016 and R 336.1901(b): an "unreasonable interference with the comfortable enjoyment of life and property." Copies of the lab reports are enclosed.

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by December 9, 2021 (which coincides with 21 calendar days from the date of this letter). The written response should include: the dates the violation occurred; an explanation of the causes and duration of the violation; whether the violation is ongoing; a summary of the actions that have been taken and are proposed to be taken to correct the violation and the dates by which these actions will take place; and what steps are being taken to prevent a reoccurrence.

Please submit the written response to the EGLE, AQD, Detroit District, at 3058 West Grand Boulevard, Suite 2-300, Detroit, Michigan 48202 and submit a copy to Ms. Jenine Camilleri, Enforcement Unit Supervisor at EGLE, AQD, P.O. Box 30260, Lansing, Michigan 48909-7760.

If Edw. C. Levy Plant 6 believes the above observations or statements are inaccurate or do not constitute a violation of the applicable legal requirements cited, please provide appropriate factual information to explain your position.
