SUBJECT: Concrete batch plant		
RESOLVED COMPLAINTS:		

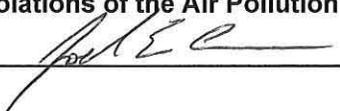

On 7/19/2016 I conducted an unannounced inspection of this facility. My contact was Mr. Terry Martin, lead driver.

This facility continues to operate a concrete batch plant. A baghouse is utilized to control fugitive emissions from the silo. Mr. Martin stated the baghouse was last inspected about 6 weeks ago. Spare bags are on order.

When needed, water is applied to the drive with a concrete truck to control dust.

The facility presently has 2 drivers. To date they have produced approximately 300 cubic yards of concrete. This is down from normal production.

No violations of the Air Pollution Control Rules were observed during this inspection.
