

DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: On-site Inspection

B721172582

| | | |
|---|--------------------------------------|----------------------------------|
| FACILITY: Eugene Welding Company | | SRN / ID: B7211 |
| LOCATION: 640 North Ovid Road, ELSIE | | DISTRICT: Lansing |
| CITY: ELSIE | | COUNTY: CLINTON |
| CONTACT: | | ACTIVITY DATE: 05/16/2024 |
| STAFF: David Rauch | COMPLIANCE STATUS: Compliance | SOURCE CLASS: |
| SUBJECT: An unannounced inspection was conducted to see if the welding company still exists and if the permit can be voided. | | |
| RESOLVED COMPLAINTS: | | |

On May 16, 2024, the State of Michigan's Environment Great Lakes and Energy (EGLE), Air Quality Division (AQD), conducted a routine inspection of Eugene Welding Company. The facility location is at 640 N. Ovid Rd, Elsie, MI.

The Environmental Contact:

NA

Facility Description:

This facility was previously a residential business that operated as a small welding company out of a residential home. There had not been any field inspections in our records on this site.

Regulatory Overview:

This facility is classified as a minor source based on it's potential to emit.

Fee Status:

This is not a fee subject source.

Facility History:

This site had a PTI issued in 1985.

Location:

This site is located on Ovid Rd. and is currently a private home.

Inspection:

Drove to the home where it did not appear to have a residence on the property. I could see a very old exhaust stack on the barn in the backyard. While I was on site, I observed the barn had been converted into a chicken coop and there were chickens walking around and into the barn space. It does not appear that the space has been operating as a commercial welding business.

Conclusions:

I will be voiding the original PTI 962-84 and closing out this site as a potential air contamination site.
