Hello Robert Joseph,

Below are our steps to address the violation notice sent to us on 5-29-2024.

For the record keeping for the maintenance log, you will see an attachment to the back of this letter for the people to fill out the date and time of shut off why it was shut off and date and time of when it was turned back on. Once the sheet is full, we will scan it onto the server where it will be kept indefinitely.

For the section we violated for the logging of the temps of the after burner every 15 minutes and keeping the records for a minimum of 5 years here is our plan to accomplish this. We have Perceptive Controls logging into the system by 7-12 to download software that will track and hold the data. We will also be loading a flash drive into the system at the end of the week Friday and downloading all the information from the touch screen onto the flash drive. The flash drive will then be taken to a computer that is connected to the server and saved onto the server so it can be saved indefinitely and on 2 systems so that way we have it backed up if any problems happen or either system loses the data.

Michael Furneaux  
Manufacturing Manager

# DEWAX SHUTDOWN
