Dear Steven Fuller:

VIOLATION NOTICE

On August 14, 2024, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of American Jetway Corporation (hereafter American Jetway) located at 34136 Myrtle Street, Wayne, Michigan. The purpose of this inspection was to determine American Jetway's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); and the Air Pollution Control Rules.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Mixing Room	Rule 201	A mixing room emitting air contaminants has been installed and is being operated without first obtaining a permit to install (PTI).

During this inspection, it was noted that American Jetway had installed and commenced operation of an unpermitted process at this facility. The AQD staff advised American Jetway on August 14, 2024, that this is a violation of Rule 201 of the administrative rules promulgated under Act 451.

A program for compliance may include a completed permit to install (PTI) application for the mixing room. An application form is available by request, or at the following website: www.michigan.gov/air.

Be advised that Rule 201 requires that a permit be obtained prior to installation, construction, operation, reconstruction, relocation, or alteration of any process or process equipment which may be a source of an air contaminant.

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by December 26, 2024 (which coincides with 21 calendar days from the date of this letter). The written response should include: the
