RESOLVED COMPLAINTS:		

On 9/24/2014 I conducted an unannounced inspection of this facility. My contact was Mr. Michael Lorenzetti.

The facility continues to operate their concrete plant permitted under PTI # 108-76. Mr. Lorenzetti stated the bags in the baghouse were cleaned about one month prior to this inspection. He estimated they have run maybe a dozen loads through the plant this year.

The facility has built a larger watering truck for fugitive dust control on the yard area. The new truck covers a 40 foot swath and applies 5 gallons in 3.5 seconds while the pump is at idle speed. This unit has a 3000 gallon tank. Water is applied as needed. No evidence of fugitive dust issues were observed.

No complaints have been received regarding this facility and no violations of PTI # 108-76 were observed during this inspection.
