SRN: F9158, Oakland County

Dear Mr. Fendt:

VIOLATION NOTICE

On August 28, 2020, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Fendt Builder's Supply located at 22005 Gill Road, Farmington Hills, Michigan. The purpose of this inspection was to determine Fendt Bulder's Supply's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 244-98A.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
FGBOILERS	PTI No. 244-98A, VIII Stack/Vent Restrictions	The exhaust gases from SVBOILERS are obstructed by a conical rain cap. The permit specifies that the exhaust gasses shall be discharged unobstructed vertically upwards to the ambient air.

During this inspection, AQD staff observed that the exhaust gases from SVBOILERS are obstructed by a conical rain cap. The stack and vent restrictions per PTI No. 244-98A, SVBOILERS VII specify that the exhaust gases from the stack shall be discharged unobstructed vertically upwards to the ambient air unless otherwise noted. The conical rain cap obstructs the vertical upwards discharge.

A program for compliance may include a completed PTI application for the FGBOILERS process equipment. An application form is available by request, or at the following website: www.michigan.gov/air (in the shaded box on the upper right-hand side of the page). Please be advised that the conical rain cap may not need to be removed if the department approves a permit application to modify this permit restriction.
