List of Partial Compliance Evaluations :

Activity Date	Activity Type	Compliance Status	Comments
05/26/2016	MAERS	Compliance	MAERS Report Audit: Pre-audit score was high (267) and it appears it is related to number of emission units that were added (including associated stacks) this reporting cycle due to equipment installations and emission unit nomenclature changes that were done to more closely match the facility's synthetic minor permit. Facility initially reported that RGEMERGEN did not operate in 2015 and staff questioned that via email on 5/9/16. Facility response dated 5/26/16 stated that this box must have inadvertently been checked and that fuel throughput was 2,386.6 gallons diesel fuel for 2015. Staff revised report to enter throughput and emissions based on MAERS emission factors that were used for all operating emission units. -RIL
04/29/2016	Self Initiated Inspection	Non Compliance	Self Initiated Inspection
12/15/2015	Telephone Notes	Non Compliance	Enforcement Conference Call - MAERS Non-submittal
