On August 10, 2022, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of B & L Plating located at 21353 Edom, Warren, Michigan. The purpose of this inspection was to determine B & L Plating's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and to investigate a report which we received from the EPA on August 8, 2022. The report alleges that B & L Plating is discharging untreated chrome plating toxins and metals into the sanitary sewer/groundwater. The report further alleges that no functioning water or air cleaning equipment is in use at B & L Plating.

During the inspection, staff observed the following:
