RESOLVED COMPLAINTS:		

On October 23, 2013, I, Rebecca Loftus, Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of Venture Industries, SRN: N0096, located at 35135 Groesbeck Highway, Mount Clemens, Michigan. The purpose of the inspection was to determine the facility's compliance with the Federal Clean Air Act, Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act of 1994, PA 451, as amended, and Michigan's Air Pollution Control Rules.

Upon arrival, I noted Venture Industries is no longer in business at this location. I spoke with Ms. Melanie Murray who explained the building is currently warehouse/office space for Claw Logistics and, in the future, they may use the building for plastic injection processes.

Upon returning to the office, I noted Venture Industries had a permit application for this location in 1983 (No. 63-83). The application was voided on February 27, 1985.

Based on my conversation with Ms. Murray, I will leave the facility as operating in our database. Although the facility does not currently have activities subject to air regulations, if Claw Logistics does move plastic injection equipment to the facility, another inspection is recommended.
