Lansing, MI 48909-7742

Dear Mr. Hude,

This letter is a follow up to our phone conversation on 5/30/2017 In response to Violation FG-FACILITY #6 And FG-FACILITY #7 concerning HAP Individual and Aggregate emissions are not being tracked and recorded.

As I mentioned in our phone conversation stating that Barr Engineering would be updating our Environmental database. On 6/12/2017, Mr. Ken Dowell of Barr Engineering visited LP&P to begin work up dating our database to include tracking and recording our HAP's. In speaking with Mr. Dowell, he said HAP emissions entry was on our Database but was not supported to actually record this data. Mr. Dowell is re-programming HAP emissions to correct this issue and improve the overall performance of the Environmental Database. Barr Engineering has given me a target date of July 1, 2017 to have the database up and running.

If further information is required, please contact me at your earliest convenience.

Best Regards,

A handwritten signature in black ink that reads "John Kuruda" followed by the date "6-20-2017". The signature is fluid and cursive.
