10/28/15

Kerry Kelly  
Environmental Quality Analyst  
Permit # 936-91

I am writing you in response to the violation notice dated October 23, 2015.

The first violation was "add permit # 936-91 special condition 18" which was we did not provide records of  
The amount of concrete crushed. Please see the attached Logs for the entire year.

The second violation was "add permit #special Condition 19" did not apply additional applications of water when the previous application did not become effective. This

We have since advised the yard foreman to increase water application and to monitor the yard closely, and to apply water as much as needed.

I hope this satisfies the violations we received and if not please advise what further I need to do.

Thank you,

RJ Orozco – Vice President

State Crushing, Inc.
