Tyler Salamasick  
Environmental Quality Analyst  
Permit # 936-91

I am writing you in response to the violation notice dated August 26, 2016

The violation was for PTI NO. 8-16, SC.VI.3 and 5 (R336.1201 (3)). Performance and record keeping requirements for daily visible emissions observations. The Violation was brought to our attention after a visit to our site on August 9, 2016. The reason this violation occurred is simply we misunderstood that we had to begin the process of doing daily visible emissions observations right away; we thought we were supposed to start after our consent orders were processed. We have since started to complete this test and record keeping and I have included a few of the test with this response for you review.

Thank you,

RJ Orozco – Vice President

State Crushing, Inc.
