Subject: Violation Notice, Elm Plating Co. 1319 South Elm Street, Jackson, MI 49203, SRN: N3209

Dear Mr. Kovalchick,

In the response to Violation #6 of the Violation Notice of October 19, 2017, Elm Plating Co. wishes to inform you that we have chosen to purchase and install control devices (see enclosed product information) to capture the particulate emitted from the Quench Oil Tanks in the Heat Treat Department and exhaust the devices back into the Building atmosphere. Three units have been purchased, one for each Tank, to be operated simultaneously with each furnace line. This option was chosen to preclude possible future violations of opacity or odor that could have resulted from directly venting these sources to atmosphere.

The manufacturer of the control equipment has entered the order into his system and has informed us that delivery will be in the week of March 6, 2018. Fabrication and installation of duct work, mechanical and electrical installation is expected to take 3 weeks after delivery. Our completion date is March 31, 2018.

Please feel free to contact me at (269) 986-5552 if you have any questions or comments.

Bill Walters
Sincerely,

Bill Walters
President, Elm Plating Company.
