October 12, 2015

Michelle Luplow
Michigan Department of Environmental Quality
525 West Allegan St. PO Box 30242
Lansing, MI 48909-7742

Dear Ms. Luplow:

This letter is in response to the violation notice dated September 22, 2015.

During your inspection on July 8, 2015 and after review of records, it was discovered that we were in violation of rule 201 and 287(c) 200 gallon (minus water) exemption.

Our internal investigation determined that our recordkeeping system did not identify a significant increase in the use of UV inks on the emission unit in question (EU-Packaging-26) which resulted in our usage exceeding the 200 gallons (minus water) allowed under Rule 287(c) during October and December 2013 and April and August 2014.

To correct this situation, we are completing the following actions:

- We will submit a permit to install for this piece of equipment (EU-Packaging-26) by mid November 2015 which will eliminate the need for separate material usage tracking on this machine.
- I have worked with our Scheduling Department and the manager of that department will flag any large jobs like those that were produced during the months we were in violation and we can easily spread that work over the other permitted presses to keep EU-Packaging-26 in compliance.

Until the permit to install is received, we will be checking the material usage on EU-Packaging -26 once per week to confirm we are below the 200 gallons (minus water) allowable limit under 287 (c)

We feel that these actions will resolve the exceedances identified during the inspection.

If you have any questions, please feel free to contact me at 517-886-2373 or Tom Starin, Environmental, Health and Safety Manager at 517-819-4409..

Sincerely,

A handwritten signature in cursive script that reads "Linda Hall".
