none

Inspection Summary

This inspection was completed to determine if permit 630-92 was still valid and if the equipment was still installed.

I arrived onsite at approx. 2:00pm and went to the facilities garage. I met both Cheryl and Fred and informed them of my visit. Fred stated that the permitted waste oil furnace had been removed prior to 2000 and the building was now heated with natural gas. He took me to an area of the shop where the furnace once was. The stack exit through the roof was still visible.

This report will be used to void permit 630-92 in accordance with MDEQ memo Procedure for Voiding Permits to Install, dated June 7, 1999.

Notification will be sent to:

Gordon Food Services

Attn: Jim Pryer
