

DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: Self Initiated Inspection

N394833968

FACILITY: GEROU EXCAVATING INC		SRN / ID: N3948
LOCATION: H13 AND M28, WETMORE		DISTRICT: Upper Peninsula
CITY: WETMORE		COUNTY: ALGER
CONTACT: Tom Lucky , Manager		ACTIVITY DATE: 03/28/2016
STAFF: Joel Asher	COMPLIANCE STATUS:	SOURCE CLASS: MINOR
SUBJECT: Waste oil furnace		
RESOLVED COMPLAINTS:		

On 3/28/16 I conducted an unannounced inspection of this facility. My contact was Mr. Tom Lucky.

The facility continues to collect used oil from equipment repairs done on-site and burn it in a waste oil furnace in their shop. No oil is collected from off-site other than that purchased from a fuel supplier.

Waste oil sample GER-1 was collected from the oil tank that feeds the furnace. This will be submitted for laboratory analysis.

Final determination of compliance will be made upon receipt of the laboratory analysis.

On 4/12/16 the results were received from the laboratory. These results show waste oil sample #GER-1 was within acceptable parameters.

This facility is found to be in compliance of the Air Pollution Control Rules.
