FACILITY: GREAT LAKES WOOD PRESERVING		SRN / ID: N5070
LOCATION: OLD HIGHWAY 43, NADEAU		DISTRICT: Upper Peninsula
CITY: NADEAU		COUNTY: MENOMINEE
CONTACT: Lyle Gearheart , Treating Plant Operator		ACTIVITY DATE: 07/19/2017
STAFF: Sydney Bruestle	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: Onsite inspection to verify compliance with PTI 597-93		
RESOLVED COMPLAINTS:		

On July 19, 2017 I (Sydney Bruestle) performed an onsite inspection at Great Lakes Wood Preserving located at Old Highway 41, Nadeau, MI. I arrived onsite around 2:30 pm central time and met with Mr. Lyle Gearhart, Treating Plant operator.

Great Lakes Wood Preservers (GLWP) is a sister company to the Cedar River Lumber Company. GLWP pressure treats wood products with alkaline copper quaternary (ACQ), a water based wood preservative. The original permit (PTI No. 597-93) was issued to Gilbert & Bennett Manufacturing to use copper chromated arsenate (CCA) as the preservative. Now the facility uses ACQ, exclusively.

The wood treatment process was not operating at the time of my inspection, therefore no visible emissions were observed (Special Condition No. 11).

At the time of my inspection it appeared the facility was in compliance with PTI 597-93 and all other applicable state and federal air quality regulations.
