RE: SRN: N5145 MACOMB COUNTY
SUBJECT: VIOLATION NOTICE

Industrial Metal Coating received a notice of violation for a complaint on February 13, 2020.

An email was received from EGLE notifying Industrial Metal Coating of the complaint. Industrial Metal Coating requested the time of the complaint and the time when EGLE detected the odors downwind from Industrial Metal Coating to see if we could determine the source. Industrial Metal Coating did not receive a response from EGLE.

For the months of December, January and February, we have been experiencing problems with our burn off ovens, most likely due to a combination of the weather and a lack of use. We were fixing and attempting to test the ovens during the day to ensure the problem had been resolved. This may or may not have contributed to the complaint. Odors are still being generated around the area and we continue to document.

Industrial Metal Coating has been operating normally on a daily basis without issue.

Thank you,
