Re: Industrial Metal Coating
Violation Notice
SRN: N5145, Macomb County

Dear Mr. Joseph and Ms. Rosa:

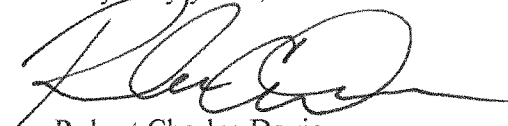

This responds to the Violation Notice dated July 3, 2024, concerning the installation of a device to continuously monitor and record the temperature in the secondary chamber of each burn off oven at least once every fifteen (15) minutes. This is also a follow-up to our communication dated July 15, 2024.

Rule 336.1910 does not address this specific requirement. The Consent Judgment does not address this specific requirement. The requirement is not addressed in PTI No. 106-94 and PTI No. 25-16. This requirement, for the first time, appeared in PTI 25-16A at Section VI. 2.

Based on the newly imposed language at Section VI. 2 of PTI 25-16A, Industrial Metal ordered two (2) Honeywell Units to meet this requirement. The units were ordered through Pyro Service Company, 25812 John R Road, Madison Heights, Michigan 48071. At this time, installation is completed and Industrial Metal is monitoring this newly installed equipment. We will provide you with evidence of the purchase and installation.

We view this violation as closed. Please confirm.

Very truly yours,

Robert Charles Davis
