**MAERS Reporting**

none

**MAERS Emission Unit List**

none

**Inspection Summary**

I stopped to inspect this site on 10/7/16. The site is an active Admiral gas station. I confirmed that no remediation device is on site after walking the property and speaking with the manager Donna Nowak.

Upon returning to the office, I contacted Jim regarding the site. He provided Randy's information as the consultant for the site. On 10/13/16, I spoke with Randy via phone and confirmed that a remediation device was no longer on the property. Randy stated that they are conducting periodic water monitoring and he believes a future remediation device will not be required. I informed him that I would be voiding the permit and confirmed the address for the owner as listed by the DEQ Storage Tank Information Database website after finding that the address listed for Clark was no longer current.

I also informed Randy of the Rule 285(w) exemption currently in place and emailed him the following information pertinent to the exemption:

Should further remediation be needed, a new permit will need to be obtained unless the following conditions apply:

1. Two-stage carbon, thermal incineration or catalytic incineration control is utilized.
2. Stack heights are at least 1.5 times the building height.
3. Actual emissions, after control, are less than two tons per year.
4. The spill consisted of only VOCs from BTEX (Benzene, Toluene, Ethyl Benzene and Xylene), gasoline, fuel oils, or natural gas products (no chlorinated compounds or waste oil).

I also informed Randy that although the permit will be voided, this site will still have an "open" status in the RRD spill database until further action by the appropriate parties is completed. The RRD contact for this site is Jim Innes.

The void notification letter will be sent to the following address:

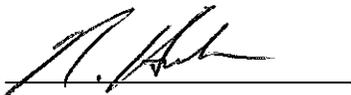

Admiral Petroleum II LLC  
785 W Randall Street  
Coopersville, MI 49404

And

Compliance, Inc.  
802 E. Grand River Ave.  
Suite 101  
Brighton, MI 48116

A copy of this report will be used to void PTI 417-94 in accordance with MDEQ memo Procedure for Voiding Permits to Install, dated June 7, 1999.
