STAFF: Joel Asher	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Human crematory		
RESOLVED COMPLAINTS:		

On 1/7/2014, I conducted an unannounced inspection of this facility. My contact was the owner, Mr. Grabowski.

The facility continues to operate its human crematory. The unit was in operation upon arrival. Mr. Grabowski stated he had just started the second of 11 cycles scheduled for the day. They have completed 17 cremations already this month. 847 cremations were conducted during 2013.

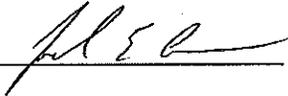

The unit continues to operate without problems. The floor has been rebuilt since the last inspection.

The unit was observed to be operating at 1640 degrees in the secondary combustion chamber. This is in compliance with Special Condition 18 of PTI 392-95 which requires a minimum temperature of 1600 degrees F in the secondary combustion chamber. No emissions were observed coming from the stack.

No complaints have been received regarding this facility.

The facility appears to be in compliance with PTI #392-95 and the Air Pollution Control Rules.
