SUBJECT: Inspection to confirm permitted equipment has been disabled or removed.		
RESOLVED COMPLAINTS:		

Visited this site to confirm that this facility is not in operation and has rendered inoperative as claimed by Rob Jones in a recent message (attached). The facility has clearly not been in operation for some time. The permitted equipment was, for the most part, still in place, but was disconnected from any wells that might feed it. It is recommended that PTI 625-96 be voided and the facility marked shut down.
