

DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: Scheduled Inspection

N623531610

FACILITY: Merit Energy Company - SIMPSON T CPF		SRN / ID: N6235
LOCATION: CUNNINGHAM RD, KALKASKA		DISTRICT: Gaylord
CITY: KALKASKA		COUNTY: KALKASKA
CONTACT: Vicki Kniss , Regulatory Affairs		ACTIVITY DATE: 09/29/2015
STAFF: Gloria Torello	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: Follow-up inspection.		
RESOLVED COMPLAINTS:		

Earlier in 2015 AQD staff visited the facility and determined the permitted engine was removed. As a follow-up, AQD staff sent the permittee a letter requesting they void permit 103-97. The permittee responded stating the engine was not removed. AQD staff returned to the site on 9/29/15.

Indeed there is an engine on site. The engine is located in a building on the north side of the development. The engine is smaller than other engines observed at CPFs. The engine was not operating. There was a clip board on the engine with sheets titled: "Daily Gas Compressor Operating Variables." The date on the sheet included *May* and the year appeared to be *14*. Per the March 16, 2015 letter from the permittee, the producing wells are either plugged or approved for plugging, therefore the most recent information was from July 2013.

AQD staff counted 13 structures on the development of varying sizes.
